Store Setup Guide

ZAHRA Palestine — everything you need to set (or replace) before launch, exactly where to change it, the value the demo store has now, and space to write your own.

How to use this guide

1. Open the admin panel: **https://your-domain/admin** (on your computer: **http://localhost:3000/admin**) and sign in with **tarek@admin.com** / **tarek123** — then change them right away (section 2).

2. Go section by section. The **Where** line tells you which menu to open. Changes are saved and live immediately.

3. **Now (demo value)** is what the store shows today. Write your real value in the white **Your value** box, then type it into the admin panel.

4. ★ marks what must be set before you open the shop. Fields marked **EN / AR** have an English and an Arabic box side by side.

Contents

1. Server file (.env)
2. Your admin login & team
3. Store details, phone & location
4. Theme colours
5. Shop rules
6. Delivery zones & fees
7. Payments (cards ready to switch on)
8. Invoices (PDF)
9. Emails from your website

11. Categories & menu
12. Home page
13. Offers & discount codes
14. Information pages
15. Search engines (SEO)
16. Statistics
17. Daily orders — how it works
18. Go-live checklist
A. Appendix A — demo products
B. Appendix B — categories

1. Server file (.env) — set once

Where: the file named **.env** in the store folder (copy it from **.env.example**) or your host's "Environment variables" screen — then restart the store

Technical settings for whoever installs the store on your server (hosting with **Node.js 22.13 or newer**, Node 24 recommended — no "npm install" needed). Everything after this section is done in the admin panel.

	Setting	Now (demo value)	Notes	Your value
★	Website address (BASE_URL)	http://localhost:3000	Your real https address, e.g. https://yourstore.ps — used in emails, invoices and card payments.	
★	Live mode (NODE_ENV)	development	Set to production on the real server.	
	Default language (DEFAULT_LANG)	ar	Language for first-time visitors: ar or en.	
	Demo catalog (DEMO_DATA)	on	Loads the demo products once on the very first start; off = start with an empty shop.	
★	Domain name + HTTPS	—	Buy the domain, point it to your server and add a free HTTPS certificate (steps in the README).	

When you update the store files later, keep the **data** folder — it holds your database, orders and photos.

2. Your admin login & team

Where: Admin → My account · Admin → Users & admins

The store starts with one admin account. Change its email and password as soon as you sign in — until you do, the admin panel shows a red reminder at the top.

	Setting	Now (demo value)	Notes	Your value
★	**Admin login email**	tarek@admin.com	Admin → My account → Login email (confirm with your current password).	
★	**Admin password**	tarek123	My account → New password (8+ characters). Other devices are signed out.	
	More admins (staff)	—	Users & admins → Add user → Role: Admin. Everyone gets their own login.	
	Remove an admin	—	Open the user → Delete (or change the role to Customer). The last admin can't be removed.	
	Customers	—	Same page: search, edit details, set a new password or delete. Past orders are kept.	
	Locked out?	—	On the server run: npm run reset-admin -- you@yourstore.ps "new password".	

3. Store details, phone & location

Where: Admin → Settings → Store

Shown in the header, footer, contact page, emails, **PDF invoices** and on the WhatsApp button.

	Setting	Now (demo value)	Notes	Your value
★	**Store name — EN**	ZAHRA Palestine	One line in the header; also in emails and on invoices.	
★	**Store name — AR**		زهرة فلسطين	
	Tagline — EN / AR	Makeup, skincare & fragrance — delivered across Palestine	Short line in the footer.	
	Logo	none (text logo)	Optional. **PNG or JPG** (so it also prints on invoices), transparent background, about 600 × 160 px.	
★	**Contact email**	info@yourdomain.ps	Shown on the site; also receives new-order emails unless you set another address (section 9).	
★	**Phone number**	+970 59 000 0000	Footer, contact page and invoices.	
★	**WhatsApp number**	970590000000	Digits only with country code, e.g. 970599123456. Powers the green WhatsApp button.	
★	**Address / location — EN**	Al-Irsal Street, Ramallah, Palestine	Your shop or warehouse location (also on invoices).	

	Setting	Now (demo value)	Notes	Your value
★	Address / location — AR		شارع الإرسال، رام الله، فلسطين	
	Opening hours — EN / AR	Sat–Thu, 9:00–19:00		
	Instagram / Facebook / TikTok	placeholder links	Paste your page addresses; empty ones are hidden.	

Also change the WhatsApp link in the home-page tile “Online consultation” (Admin → Banners). It currently uses https://wa.me/970590000000.

4. Theme colours

Where: Admin → Settings → Theme colours

The store uses a clean black & white look. You can pick any other shades — changes are instant.

Setting	Now (demo value)	Notes	Your value
Main colour (text, buttons, top bar)	#000000		
Accent colour (highlights)	#000000		
Sale price & discount badge	#000000	Many shops use red here for prices on sale.	
Light background (cards, panels)	#f5f5f5		

5. Shop rules

Where: Admin → Settings → Shop rules

	Setting	Now (demo value)	Notes	Your value
	Currency code / symbol	ILS / ₪	Prices are entered in this currency.	
★	Free delivery over	200 ₪	0 = never free. Each delivery zone can override it.	
	Minimum order amount	0 ₪	0 = no minimum.	
	Site-wide discount %	0 % (off)	Enter 20 to show −20% on every product during a sale.	
	Low-stock alert at	5	The dashboard and the product list warn you when stock drops to this number.	
	Order number prefix	ZH-	Orders and invoices are numbered ZH-1001, ZH-1002 …	

6. Delivery zones & fees

Where: Admin → Delivery zones

Customers choose one zone at checkout; its fee is added to the order.

Zone (EN)	Zone (AR)	Fee now	Free over	Delivery time	Your fee / free over / time
West Bank	الضفة الغربية	20 ₪	store rule	1–3 working days	
Jerusalem	القدس	30 ₪	store rule	2–3 working days	
Inside (48 areas)	الداخل (أراضي 48)	70 ₪	400 ₪	3–5 working days	

Add zones with “Add new” (e.g. a city with same-day delivery). Empty “Free over” = uses the store rule; 0 = never free in that zone.

7. Payments (cards ready to switch on)

Where: Admin → Settings → Payments

Cash on delivery works now. Card payments (PayTabs) are already built in — you only add your merchant details.

	Setting	Now (demo value)	Notes	Your value
★	**Cash on delivery**	ON · extra fee 0	How most customers in Palestine pay.	
	Card payments	OFF	Turn on when your PayTabs merchant account is ready.	
	PayTabs Profile ID	empty	PayTabs dashboard → Developers → Key management.	
	PayTabs Server key	empty	Keep it secret. Leaving the box empty keeps the saved key.	
	PayTabs region URL	https://secure-global.paytabs.com	Ask PayTabs which address your account uses.	
	Charge cards in	USD	If your account can’t charge ₪, use USD or JOD.	
	Exchange rate (1 ₪ = ?)	0.27	Update it when the rate changes.	
	Cancel unpaid card orders after	6 hours	Frees stock held by abandoned card payments.	

Tip: choose provider “Test mode” to try a complete card checkout before going live (only while NODE_ENV is not production). When a card payment is confirmed, the customer automatically gets the confirmation email with the PDF invoice.

8. Invoices (PDF)

Where: Admin → Settings → Invoices

Every order gets a PDF invoice in the customer’s language (Arabic or English). Customers download it from their order page and receive it with their confirmation email; you can open, print or email it again from the order page.

Setting	Now (demo value)	Notes	Your value
Invoice title — EN	Invoice	e.g. “Tax invoice” if you are VAT-registered.	
Invoice title — AR	فاتورة		

	Setting	Now (demo value)	Notes	Your value
	Legal / company name	empty	Printed under your store name.	
★	Tax ID / licensed dealer no.	empty	Printed on every invoice when filled in.	
	VAT included in prices (%)	0	0 = no VAT line. Enter the rate your accountant gives you; the invoice then shows the VAT included in the total.	
	Note at the bottom — EN / AR	empty	e.g. your return & exchange policy.	
	Attach invoice to emails	ON	The PDF is attached to customer confirmation emails.	

The invoice number is the order number (ZH-1001 …). Your logo is printed on invoices when it is a PNG or JPG file (section 3).

9. Emails from your website (+ Telegram)

Where: Admin → Settings → Notifications · your hosting control panel → Email Accounts

Use the mailbox that comes with your hosting, e.g. **info@yourdomain.ps**. Without these settings orders still arrive in the admin panel — but customers get no confirmation and no invoice by email.

	Setting	Now (demo value)	Notes	Your value
★	Send new-order emails to	store email	Your own inbox or a shared shop inbox.	
★	SMTP host	empty	Usually mail.yourdomain.ps (cPanel → Email Accounts → Connect Devices). Gmail: smtp.gmail.com.	
★	SMTP port	465	465 (SSL) — or 587 (TLS) if your host says so.	
★	SMTP user / password	empty	The full mailbox address (info@yourdomain.ps) and its password. Gmail needs an “App password”.	
	From address	empty	e.g. ZAHRA Palestine <info@yourdomain.ps> — the sender customers see.	
	Telegram bot token / chat ID	empty	Optional: instant new-order alerts on your phone (create a bot with @BotFather).	

Then press “Send test email” and “Send test Telegram message” (Settings → Backup & tests). Ask your host to enable SPF/DKIM for your domain so emails don’t land in spam.

When	Customer gets	You get
Cash-on-delivery order placed	Confirmation + **PDF invoice**	New-order email + invoice copy (+ Telegram)
Card order placed	— (waits for the payment)	New-order email (+ Telegram)
Card payment confirmed	“Payment received” + **PDF invoice (Paid)**	Payment email + invoice (+ Telegram)
You set Payment → Paid (box ticked)	Receipt + invoice	—

When	Customer gets	You get
Status changed (box ticked)	Status update	—
Order page → Email invoice to customer	The invoice again	—

10. Products & prices

Where: Admin → Products

The demo store has 52 sample products with drawn illustrations (Appendix A). Edit them into your real products or delete them.

Quick tools on the product list	How
Change price / sale price / stock	Type in the row and press **Save** on that row. (Products with shades: change the stock inside the product.)
Show / hide a product	Click the green **Active** / grey **Hidden** button in the row.
Change many products at once	Tick them → **With the selected products…** → e.g. Put on sale (– %), Remove sale price, Hide, Add to category, Mark as New → **Apply**.
Hundreds of products	Products → **CSV** (download) → edit in Excel → **Import CSV**.

Adding a product (Products → New product) takes 4 steps: name → photos → price & stock → category → **Save**. Everything else is optional.

	Field	What to enter
★	Name — AR / EN	One language is enough — the other name is filled in automatically; edit it any time.
	Short description — AR / EN	One line under the name, e.g. “Matte finish, up to 8 hours”.
★	Photos	Drag & drop or “Upload images”. Clear square photos (1000 × 1000 px or larger); the first one is the main photo; big photos are resized automatically.
★	Price (₪) / Sale price	Regular price, and an optional lower sale price (shown crossed out with a –% badge; the form shows the saving as you type).
★	Stock	Quantity you have. Use shades instead if the product comes in colours or sizes.
★	Categories	Tick where the product appears (several allowed). “Main category” is used for the breadcrumb.
	Shades / variants	One row per colour or size: colour dot, name EN / AR, code (SKU), stock and an optional photo.
	Labels	Active (visible) · New · Best seller · Limited edition · Featured — badges and home-page rows.
	Description, How to use, Ingredients	Optional — shown in the tabs on the product page.
	Advanced settings	Web address (slug), sort order, SEO title / description — all optional.

Buttons on the form: **Save** · **Save & add another** · **Duplicate** (copy a product to make a similar one) · **View in store**.

11. Categories & menu

Where: Admin → Categories

Top-level categories form the main menu; their sub-categories open in the large drop-down. Categories without products are hidden automatically. Rename, re-order (Sort order), add or delete them. Full list in Appendix B.

Menu item (EN)	Menu item (AR)	Sub-categories	Keep / rename to
New & Collections	الجديد والمجموعات	Collections, New In, Back in Stock	
Makeup	مكياج	Face, Eyes, Lips	
Skincare	العناية بالبشرة	Face Care, Eye Care, Lip Care, Skincare Lines	
Fragrances	العطور	—	
Brushes & Accessories	الفرش والإكسسوارات	Face Accessories, Eye Accessories, Hands & Nails, Makeup Brushes, Travel	

The menu also shows “Best Sellers”, “Offers” (when something is on sale) and any page marked “Show in menu” (e.g. Beauty services).

12. Home page

Where: Admin → Banners (pictures & texts) and Admin → Home sections (product rows)

Replace the drawn demo pictures with your own photos and adjust the texts. Each banner has EN and AR titles, a button text and a link (e.g. /c/lipstick, /sale or a full https:// address).

Type	Title (EN)	Links to	Replace with
Hero slide	Desert Rose	/c/desert-rose	
Hero slide	Your daily glow ritual	/c/skincare	
Hero slide	Up to 30% off	/sale	
Category circle	Makeup	/c/makeup	
Category circle	Skincare	/c/skincare	
Category circle	Best Sellers	/best-sellers	
Category circle	Brushes	/c/makeup-brushes	
Category circle	Fragrances	/c/fragrances	
Category circle	Offers	/sale	
Collection card	Desert Rose	/c/desert-rose	
Collection card	Golden Hour	/c/golden-hour	
Collection card	Velvet Nights	/c/velvet-nights	
Collection card	Spring Bloom	/c/spring-bloom	
Service tile	Video tutorials	/page/beauty-services	
Service tile	Online consultation	https://wa.me/970590000000	
Service tile	Makeup for occasions	/page/beauty-services	
Promo banner	Free delivery over ₪200	/best-sellers	

Product row on the home page	Shows	How many	Keep / change
Best Sellers	Best sellers	12	

Product row on the home page	Shows	How many	Keep / change
Desert Rose	Category: desert-rose	12	
New In	New in	12	
Special Offers	On sale	12	
Skincare Favourites	Category: skincare	12	

13. Offers & discount codes

Where: Admin → Settings → Marketing and Admin → Discount codes

Setting	Now (demo value)	Notes	Your value
Top bar messages — EN / AR	Free delivery on orders over ₪200 · Cash on delivery to the West Bank, Jerusalem & the 48 areas · New: the Desert Rose collection is here	One message per line; they rotate. Link optional.	
Countdown offer bar	Last days! Up to 30% off selected favourites	Text EN / AR, link (/sale) and end date & time. Switch it off when no offer runs.	
Welcome popup	Join our Beauty Club	Shows the code WELCOME10 after a visitor subscribes.	

Code	Gives	Minimum order	Uses per customer	Keep / change
WELCOME10	10% off	—	1	
FREESHIP	Free delivery	100 ₪	unlimited	
SAVE20	20 ₪ off	150 ₪	unlimited	

14. Information pages

Where: Admin → Pages

Each page has an English and an Arabic text box. A blank line starts a new paragraph; simple bold and lists work.

	Page	Address	What to write	Done
★	About us	/page/about	Your story and why customers can trust you.	☐
★	Delivery & returns	/page/shipping	Must match your real fees, delivery times and return policy.	☐
	FAQ	/page/faq	Your most common customer questions.	☐
	Beauty services	/page/beauty-services	Your services, prices and how to book.	☐
★	Privacy policy	/page/privacy	Template text — have it reviewed by a lawyer.	☐
★	Terms & conditions	/page/terms	Template text — have it reviewed by a lawyer.	☐
	Accessibility	/page/accessibility	Optional.	☐
	Contact us	/contact	Short text shown above the contact form.	☐

15. Search engines (SEO)

Where: Admin → Settings → SEO

Setting	Now (demo value)	Notes	Your value
Home page title — EN	ZAHRA Palestine — Makeup, Skincare & Fragrance	The link title Google shows.	
Home page title — AR	زهرة فلسطين — مكياج وعناية بالبشرة وعطور		
Home page description — EN / AR	Shop makeup, skincare and fragrances online with fast delivery to the West Bank, Jerusalem and the 48 areas. Cash on delivery available.	One or two sentences about your shop.	

16. Statistics

Where: Admin → Statistics (or "Detailed statistics" on the Dashboard)

Pick what you want to see from the drop-down menus — the page updates immediately.

Drop-down	Choices
Period	Today · Yesterday · Last 7 / 30 days · This month · Last month · This year · Last 12 months · All time · Custom dates (from – to)
Order status	All except cancelled (default) · All orders · one status
Payment method	Any · Cash on delivery · Card
Payment status	Any · Unpaid · Paid · Payment failed · Refunded
Delivery area	Any · one of your delivery zones

What you see: sales with ▲▼ compared to the previous period, number of orders, average order, items sold, customers (and how many came back), money collected vs. still to collect, discounts and delivery fees, cancellation rate, a sales chart per day or month, best-selling products, sales by category, by order status, by area and by payment, top customers, busiest days of the week and coupons used.

Buttons: **View these orders** (same filters on the Orders page) · **Export (CSV)** opens in Excel. The Orders page has the same drop-downs, a search box and a CSV button.

17. Daily orders — how it works

Where: Admin → Dashboard and Admin → Orders

Step	What to do
New order	You get an email (with the PDF invoice) / Telegram alert and it appears in Orders as "Received". Stock is reserved immediately. Cash-on-delivery customers get their confirmation + invoice by email at once.
Confirm	Call or WhatsApp the customer (button on the order page), then set the status to "Confirmed".
Ship	When the courier collects it, set "Out for delivery" and tick "Email the customer about this change". Print the invoice (Invoice PDF → print) for the parcel.
Deliver	Set "Delivered". For cash on delivery, set Payment → "Paid" when you receive the money — tick "Email the customer a receipt" to send the paid invoice.
Cancel	"Cancelled" puts the items back in stock automatically and frees the discount-code use.
Invoice again	Order page → "Email invoice to customer", or open the Invoice PDF in Arabic or English.

Back up every week: Settings → "Download backup" (the database) and copy the folder data/uploads (your photos).

18. Go-live checklist

Where: tick each box when done

	Item	Date / notes
☐	Server: BASE_URL, NODE_ENV=production and HTTPS working (section 1)	
☐	Admin login changed from tarek@admin.com / tarek123; other admins added (section 2)	
☐	Store name, logo (PNG/JPG), phone, WhatsApp, email and address set (section 3)	
☐	Theme colours chosen (section 4)	
☐	Delivery zones and fees match what your courier charges (section 6)	
☐	Cash on delivery on; card payments tested or left off (section 7)	
☐	Invoice details: company name, tax ID, VAT, note (section 8)	
☐	Website mailbox connected; test email received (section 9)	
☐	Demo products deleted or replaced with real names, prices, stock and photos (section 10)	
☐	Menu categories renamed and tidied (section 11)	
☐	Home-page banners and rows show your own photos and offers (section 12)	
☐	Top bar messages, countdown and discount codes are real (section 13)	
☐	About, Delivery & returns, Privacy and Terms pages written and reviewed (section 14)	
☐	One real test order from a phone: confirmation email + PDF invoice received, then cancelled	
☐	First backup downloaded	

Appendix A — demo products to replace

Admin → Products. Click a product to change its name, price, photos and stock, or delete it. Prices in ₪.

#	Demo product	Main category	Price	Sale	Shades	Stock	Your product / price
1	Cloud Matte Lipstick	Lipstick	59	47	7	135	
2	Silk Satin Lipstick	Lipstick	55	—	4	100	
3	Stay-Put Liquid Lipstick	Lipstick	69	—	5	104	
4	Glass Shine Lip Gloss	Lip Gloss	49	39	4	100	
5	Plumping Lip Oil	Lip Gloss	54	—	3	75	
6	Define Lip Liner	Lip Liner	39	—	4	100
